## GASOLINE ENGINE OIL

**ELITE** Gasoline Engine Oils are an excellent choice for use in the latest gasoline engine technology. ELITE oils have been tested and exceed vehicle warranties, in both new and older gasoline vehicle models.

Conventional gasoline engine oil is an excellent choice for use in the latest gasoline engine technology and meets the operational demands for both new and older gasoline vehicle models.

### LEADING ENGINE PERFORMANCE

- Improved fuel economy and overall engine efficiency.

### ADVANCED OXIDATION CONTROL

- Prevents wear, sludge and deposits from forming, resulting in engine cleanliness.

### ENRICHED ENGINE CAPABILITIES

- Superior protection against wear resulting in prolonged engine life.

A synthetic blend gasoline engine oil designed to protect high mileage engines and to provide additional maintenance care for all gasoline engine types, ensuring older vehicles run at their peak performance levels.

### EXCLUSIVE PROTECTION FOR HIGH MILEAGE ENGINES

- Resists oil breakdown in older engines and prevents future deposit formation from occurring, resulting in a more reliable and efficient operating engine.

### EXCELLENT SEAL SWELL CONTROL

- Premium seal protection to prevent oil leaks and eliminate contaminants from entering the sealing area.

### IMPROVED PERFORMANCE

- Improves upon past engine performance and provides future protection throughout the remaining duration of the engine's life.

Full synthetic gasoline engine oil designed for the latest turbocharged gasoline direct injection (TGDI) engines. Exceeds the performance requirements of all gasoline engine types, especially for newer vehicle manufacturer models.

- Licensed General Motors dexos™ 1 Gen 3 Approved (0W-20/5W-20/5W-30).

### OPTIMIZED OIL LIFE

- Allows oil to stay in grade at higher temperatures and go longer between oil changes.

### COLD-WEATHER PERFORMANCE

- Excellent low-temperature performance allowing oil to reach the engine's vital components.

Full synthetic dexos1™ Gen 2 approved gasoline engine oil, that guarantees the extra protection required for trucks, 4x4 and SUV models. Unique additive formula created for gasoline engine vehicles with higher-torque transmissions that require advanced protection and performance when operating in extreme conditions.

### DURABLE FORMULA

- Formulated to withstand the severity and constraints of modern engines, while providing enhanced turbo-charger and piston protection.

### ULTIMATE ALL-SEASON PERFORMANCE

- Designed for all-season performance that prevents oil breakdown at high temperatures and exceptional operation in sub-zero temperatures.

### DESIGNED SPECIFICALLY FOR TRUCKS & SUVs

- Provides superior protection in trucks, 4x4s and SUVs that frequently haul and tow heavy loads in both on- and off-road conditions.
